Dion, Mateos, Orkida, Shpëtim

WHAT IS LINKED TO SPOTIFY POPULARITY?

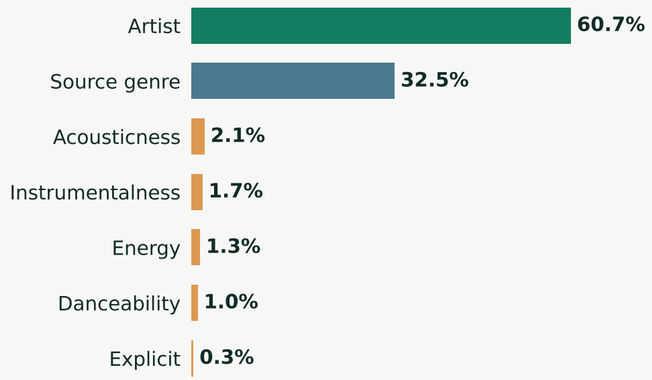

THE FINDING

Popularity varies much more across artist and genre groups than across the audio features examined.

89,740 tracks | Descriptive associations, not causes

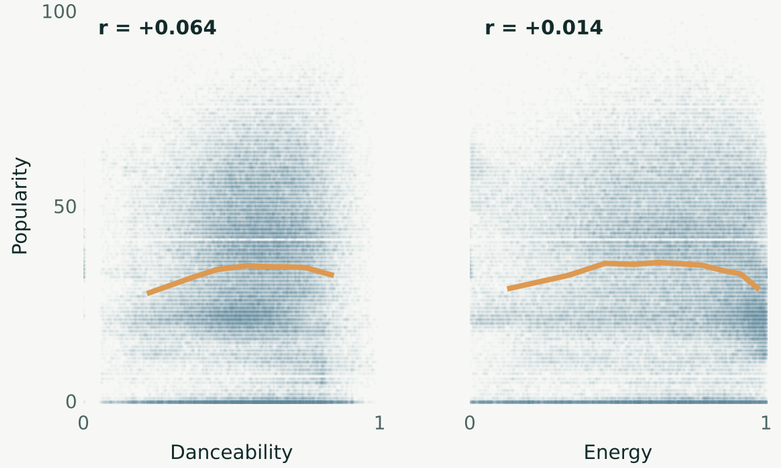

01 WHAT EXPLAINS POPULARITY

% of popularity variation explained

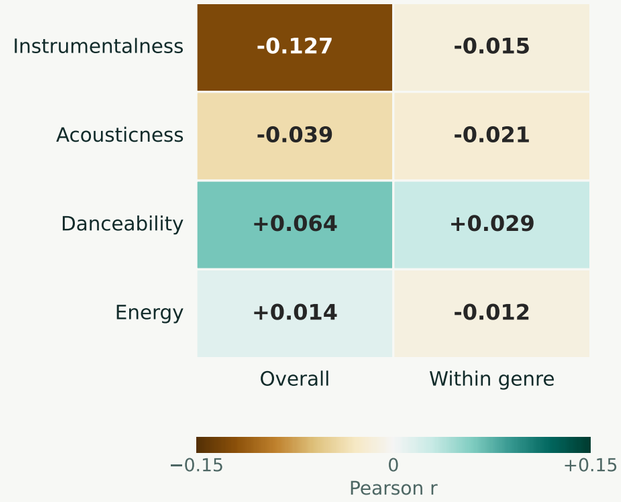

02 DANCEABILITY & ENERGY

One dot per track; line = average popularity

03 INSIDE GENRES

Correlation with popularity

LIMITS

Fixed genre quotas	114 genres × 1,000 rows each: we compare groups inside this dataset and make no claim about Spotify overall.
Conflicting scores	720 tracks have conflicting popularity scores; we use their median.
Small artist groups	Many artists have few tracks, so we report η² adjusted for the number of groups.
Not an experiment	We report associations only: no causes, no predictions.

Data: Kaggle Spotify Tracks Dataset | Popularity = Spotify 0-100 score, not streams
